

CLIMATE CHANGE SCAVENGER HUNT

OUTDOOR ACTIVITY

Head outdoors with this scavenger hunt exploring climate change and the many scientists who help with research. Use the pictures to find examples of the objects around your home and neighbourhood. Begin by viewing or printing out the page below.

SCAVENGER HUNT

CLIMATE CHANGE

Worm

Red Wiggler worms can be used for your vermicompost.

Large Rock

Geologists can use rocks to learn about past climates.

Cloud

Nephologists study clouds. There are many types like Cirrus and Cumulonimbus.

Plants

Botanists study plants. They can even check if it provides food or medicine for us.

Recycling Bin

It is important to sort our waste correctly and recycle our plastic.

Soil

Edaphologists study soil and even how to remove pollution from it.

Large Tree

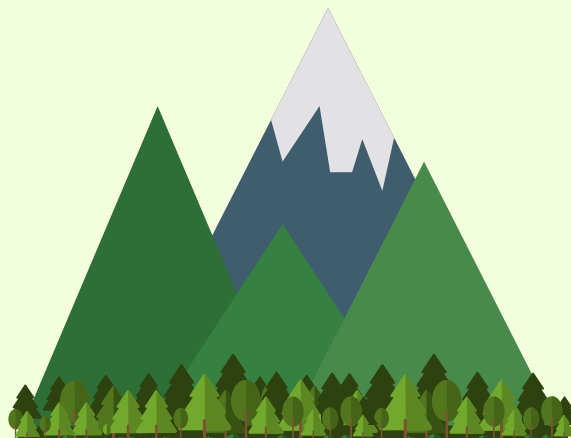

A dendrologist studies trees. Tree rings can also tell us about past climate.

Bird

Ornithologists study birds. Extreme weather from climate change can impact birds.
