

DIY Fairy Garden

Arts & Crafts Activity

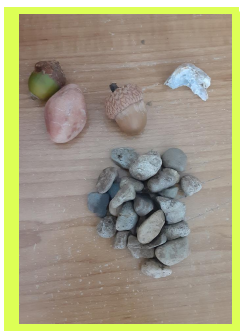

Hoping to spot a magical fairy? Did you know that fairies and magical creatures prefer living in homes made out of natural materials in nature? This DIY is a perfect way to get outdoors, use your imagination and have some fun!

Materials

- Decorative planter, basket, (preferably clay, biodegradable)
- Rocks, sticks, soil and leaves, sand
- Flowers
- Decor (seashell, pebbles, fairies)

1 Find a comfortable spot to build your fairy house - in the shade is usually the best idea, so if you have a tree or bushes in your yard or neighbourhood, that works well

2 Collect a variety of materials you can find around you, making sure not to disrupt or destroy anything growing or living in the area

Our tip is to go on a short walk in the neighbourhood and find nice pebbles, acorns and stones to decorate the fairy garden.

3 Start building - think about making the walls, roof, and maybe even a door or furniture inside. I just created a nice flower pot to sit on and enjoy the garden.

4 Keep it, or take it apart and start over again; repeat as often as you want. Grab your binoculars and wait for fairies!
