

# SPIDER PLANT

## Chlorophytum comosum

### About

Also known as anthericum comosum, spider plant, or ribbon plant, chlorophytum comosum is very popular as a houseplant because it is easy to grow and care for. Spider plants can grow up to 60cm tall, and reproduce by growing small “plantlets” on long stalks that can be used to start another spider plant!

### Care

**Light:** bright to medium

**Water:** keep soil slightly moist

### Pets

Spider plants are non-toxic and safe for cats and dogs.
