

# SCAVENGER HUNT

## POLLINATORS

While completing this scavenger hunt, follow this rule: look, but please don't touch.

### FIND SOME POLLINATORS

Each of these types of pollinators have strikingly different appearances depending on what species you find. Keep that in mind during your search!

**Bee**

**Wasp**

**Butterfly**

**Fly**

### FIND SOME HABITAT

Different pollinator species prefer different habitats. Some live above ground, while others live below. Some live in wooded areas, while other live in urban gardens.

**Fallen Log**

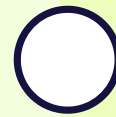

**Tall Grass**

**Patch of Soil**

**Hollow Stem**

If you have a camera or another device capable of taking pictures, bring it along on the hunt! While it's not appropriate to capture a pollinator or take its habitat, a photo will allow you to document your findings.
